With Triple Setts of Crushers and Double Grinding Surfaces, The unparalelled success of the Little Giant during more than three years, time, induced the Proprietors to consider it no longer an experiment, but a permanent and most decided "Institution." Its value to Farmers and Feeders became patent at an early period of its existence, and the demand for it was commensurate with its excellencies. Like all other sticles however, of sofficient merit to attract attention, it was soon beset with a crowd of opponents detractors and imitators, all eager to sun themselves in the sunshine of its repetation, and fatten on its hard-carned fame. Met and vanquished at one point, they spanng up in another, with as much vitality, apparently, as if possessed with the nine lives of the cat. There is not one of the Little Giant's imitators which it has not beaten, whonever and wherever a fair tees and trial has been obtained; and not one that dare mest it fair and square in trial of merits as this present time.

At the State Fair of the following States, the past season, the First Pretalum was award ed the Little Giant, viz:—

ILLINOIS, IOWA, MISSOURI, KENTUCKY.

Appended is an extract from a Report of the trial at the Iowa State Fair, at Muscatter on the 10th of October last; on the 10th or October has:

"The Corn and Cob Mills were represented by the Little Giant, Excelsior Young America and Star Mills, and an animated contest took place for the set of silver plates which had been placed at the disposal of the Society by James B. Chadwick, of St. Louis. In fifteen revolutions, with same team and quality of Corn, the Mills ground as follows:

The "Little Giant,"

One and three-fourths bushels Corn and Cob Meet.

"Excelsior Young America,"

"Star Mill,"

One and three-fourths bushels Corn and Cob Meet.

Five-eighths of one bushel. "Star Mil."

Five-eighths of one bushel.

The Committee unanimously awarded the premium to the "Little Giant."

SOME OF ITS MANY ADVANTAGES ARE:

1. Incerased capacity, with diminished diameter, by the use of double cones, thus economizing the power employed, and spending the wear over so great a surface that it is hardly perceptible; even after grinding many thousand bushels.

2. No oil or grease is required on any part of the machine, thus avoiding the possibility are by careless attendance.

John B. Moody, as Elisabeth Whitia, Administrator of William Andrews and Margaret, his wife, of the countries of William Andre

5. The superiority of the cob-breaking and crushing orrangement, enabling us to do a large portion of the work near the centre of the Mill, thereby aving power.

6. The great strength which is secured by the peculiar shape and arrangement of the whole, together with freedom from breakage or damage to the grinding parts, when nails, sticks, bricks, pebbles, or other hard substances liable to be found among corn, accidentally find their way into the Mill—a periculou arrived at from long experience in the composition of metal for this particular part.

It is one of the Washington-sized glories of our country that such a life-work as that Dictionary should have been done among us. It has gathered the broken columns of the other philologistic temples of our language, and built them into an American Parthenon. Did space permit, we could give many hundred such names, from all parts where the Pills have been used, but evidence even more convincing than the certificates of these eminent public men is shown in their effects upon trial.

These Pills, the result of long investigation and study, are effected to the public as the best and most complete which the present state of medical science can afford. They are composited not of the drugs themselves, but of the medicand virtues only of Vegetable remedies, extracted by chemical process in a state of purity, and combined together in such a manner as to insure the best results. The system of composition for nedicines has been found in the Cherry Pectond and Pills both, to produce a more efficient remedy than had hitherto been ostained by any process. The reason is perfectly obvious. While by the old mode of composition, escery medicine is burdened with poore or less of arrimonious and injurious qualities, by this each individual virtue only that is desired for the remainer effect is present. All the inert and obmediants qualities. the hands of G. P. Augustine, former Agent of the sasociation, who is authosettlerized to and receipt for the same.
